

AutoVent SPV™

SOLAR-POWERED VENTILATOR

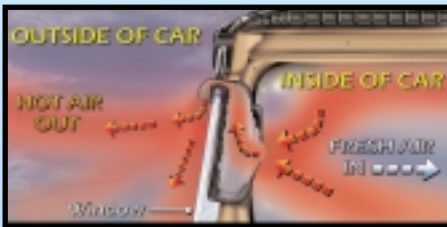

- **The only secure way to ventilate a parked vehicle!**
- **Removes hot, stale air, humidity, pet and tobacco odors.**
- **Installs in seconds on most vehicles.**

AutoVent SPV silently and efficiently eliminates stale, stuffy air from inside your vehicle, even on the hottest summer days! While your windows remain **securely** closed, this unique solar-powered ventilator draws hot air and odors, including pet and tobacco odors, out of your vehicle and replaces it with fresh air from outside. Since AutoVent SPV runs directly on natural, **FREE** solar energy, there's no drain on your vehicle's battery and no batteries to replace or recharge ever!

Installation is easy! Simply attach the included weatherproof fitting strips, place the unit on top of the window edge and roll the window closed-that's it!

AutoVent SPV helps to preserve and protect your vehicle's interior, valuable stereo and electronic equipment from the damaging effects of extreme heat build-up. AutoVent SPV also assists in reducing the strain on your air-conditioning system during start-up.

Due to its phenomenal success in catalog, direct mail and TV sales, AutoVent SPV is now available in an attractive, four-color retail package.

• **Unique • Profitable • Proven!**
